EXPERIENCE

Parati 🔗   11/2024 – 02/2025
Software Engineer
- Led end-to-end development of the company's AI-powered presentation builder used by hundreds of monthly users; built reusable UI components, dynamic pages, and highly performant interfaces with React.js, TypeScript, and Tailwind CSS.
- Integrated REST APIs and webhook-based workflows to enable real-time data sync, AI-driven slide generation, and seamless cross-component interactions, ensuring responsive and reliable application behavior.
- Implemented Razorpay payment integration, including secure transaction handling, subscription lifecycle management, and webhook-driven event processing, delivering a frictionless and scalable checkout experience.

Metabees.in 🔗   05/2023 – 09/2023
Full Stack Developer Intern
- Designed and optimized UI/UX for a VR-based web application using modern UI libraries, integrating third-party APIs for 3D world rendering and interactive environments. Developed and maintained the full-stack system using React.js on the frontend and Node.js, Express, and MongoDB on the backend, implementing authentication flows, scalable APIs, and reliable data handling for smooth application performance.

PROJECTS

Shop Wave 🔗
Full-Stack E-Commerce Web App
- Developed a full-stack MERN e-commerce platform with product catalog, advanced search, filters, sorting, cart management, checkout flow, and PayPal payment integration, delivering a production-ready and secure shopping experience.
- Built a robust admin dashboard with role-based authentication and authorization; implemented product, user, and order management features using React, Redux Toolkit, Node.js, Express, and protected API routes.
- Improved system performance using modular React architecture, optimized data fetching/caching, and MongoDB indexing for faster product queries, enabling low-latency load times and scalable backend operations.

Stoxy 🔗
Real Time Stock Market Dashboard
- Built a full-stack stock market analytics platform using Next.js 15, React 19, TypeScript, and MongoDB, designed batch quote API endpoints reducing external API calls by 90% and implemented server-side prefetching for fast load times.
- Integrated Inngest for background job processing, creating scheduled AI-generated market summaries and automated email workflows via Nodemailer HTML templates, delivered reliable full-stack workflows with Dockerready deployment on Vercel.
- Architected a combined client/server watchlist system with frontend state management and backend enrichment pipelines, delivered consistent cross-page functionality with optimistic updates and failure recovery.

TECHNICAL SKILLS

Front-End	Back-End / Database	Tools
HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS	Node.js, Express.js, MongoDB, PostgreSQL	Git, GitHub

EDUCATION

Shri Shankracharya Institute of Professional Management & Technology   2020 – 2024
B.Tech - IT
